

World is in motion, so are we...

Ever since the Earth occupied its place in the universe our planet has been on a constant move. Nature and the human kind have been trying to establish and maintain a peaceful coexistence but Man himself, with his technical gadgets, creates the greatest obstacle to a harmonious symbiosis. Right from the invention of the wheel everything runs and moves, knocks and jolts, thumps and thuds, strikes and strucks, smashes and clashes, shakes and crashes, whangs and bangs, bumps and dumps, hits, wobbles, shocks and quavers – and above all: vibrates... under the surface and on the face of our beautiful and only Globe... Man has obtained almost everything but had lost the precious treasure of the innocent times – silence...

*We can help you to regain this invaluable asset as we can provide you the answer – the silent solution is at your reach: **Meta-Vulk Kft.***

Meta-Vulk Trading Company Ltd was established in 1994 for exporting rubber and rubber-to-metal bonded items produced in Hungary.

We have a network of sub-contracting companies producing various items for us as per our orders. These support-companies have been selected by us according to their capability and capacity – they vary from a family size producer to a medium size one with 300 workers. The allotment of work is determined by the quantity, and difficulty of the product thus we can keep the overhead costs at optimal level.

Meta-Vulk Kft, Hungary offers a vast variety of high quality technical rubber products incl. extruded sealing profiles: from vibration dampers to machine-feet, from cable lead-though to door stops, from pipe holders to truck bumpers. Automotive, household and heavy industry, building – and machine building industry, aerospace, military, naval, rail, road, mining industry use our products. Here are some of our valued customers to whom we delivery our products through our trading partners.
